January 18: Location Networks & QR Codes

At the beginning of this New Year, learn about a couple of new features in technology. Location networks, such as Foursquare and GetGlue, allow users to tell their friends where they are and what they are doing. QR Codes are square shaped “bar” codes that once scanned will display more information through the Internet. Come discover how these new technologies are used.

February 15: Downloading Music

Music can be downloaded to put on a smartphone, MP3 player, or listened to on a PC. Discover websites to locate music and the methods for downloading the files to the device of choice.

March 21: Route 66: Road Trips & Technology

Whether you are planning a road trip across the country, in a state, or locally, technology can help make the trip a breeze. Learn how to plan a trip and stay on track while on the open road using today’s technology devices and key websites. The speaker’s experience of traveling on Route 66 across the country will be the basis for this adventure.

April 18: Digital Photography

Larry Hrusovsky will share with us his knowledge of digital photography. Larry adapted to the digital world of picture taking around the year 2000 and has been involved with film cameras since the early 1960’s.

Encore Series: 6:30-8:00 p.m.
